

# PCR Products

Product Code	Product Name	Product Description
FI001	FreeIT	DNA Release from numerous sources in a simple method providing DNA ready to PCR!
HS002	HotShot Diamond PCR Mastermix	PCR Mastermix complete with Ab modified Taq. Great for complex PCR and qPCR. 2X concentrated
HS003	HotShot Sapphire PCR Mastermix	PCR Mastermix complete with Ab modified Taq and a blue dye. Great for complex PCR and gel electrophoresis. 2X concentrated
SS002	SureShot PCR Mastermix	Ready to use PCR mastermix for everyday reliability
SS003	SureShot Blue	All of the SureShot convenience plus a blue dye for loading straight to electrophoresis
CP002	CleanIT PCR	One reagent for post PCR clean up of dsDNA. Super clean results ready for down stream applications
CG002	CleanIT Genomic	One reagent for cleaning genomic DNA. Re-elution without loss of DNA.
TC002	ThermoCheck	QC kit for thermocyclers. When did you last check yours biologically?
